Section 1 - Hero Section

Headline:

Smarter Workday. Stronger ROI

Subheadline:

Eliminate Workday Friction with Expert Guidance, Streamlined Processes, and Ongoing Performance Optimisation.

Primary CTA:

Request a Workday Health Checkup

Supporting Trust Line:

Seamlessly connect Implementation, AMS, and AI-led innovation across Workday HCM, Finance, and Adaptive Planning with a single trusted partner.

Section 2: Stats / Credibility Fold

Headline:

Designed for Businesses That Run on Workday.

Subheadline:

We help you bring clarity to your most critical business decisions.

Stat Blocks -

15+ Years Average Experience per Consultant

100% Workday Certified Team

Powering Workday for 50,000+ Employees Worldwide

95% Post-Go-Live Client Retention

200,000+ Workday AMS Hours Delivered

Section 3. Before Workday Friction Becomes Business Friction

Recurring issues. Manual workarounds. Unreliable reporting.

These aren't isolated problems - they're signals your Workday ecosystem needs attention.

Zeneesha helps organizations reduce operational friction and turn Workday challenges into smarter, data-driven decisions.

Stat Placeholder

Over 70% of assessed Workday environments show opportunities for further optimisation. source - [google.com](https://www.google.com)

OR

More than 70% of recently implemented ERP initiatives are expected to fall short of their original business goals by 2027. source - <https://www.gartner.com/>

Signal Cards

Recurring tickets

Problems persist when only symptoms are addressed, not the source.

Manual workarounds

When workflows feel restrictive, teams create shortcuts that reduce visibility and consistency.

Reporting delays

Even with complete data, leaders still cannot access timely answers.

Uneven adoption

Employees can access Workday, but they are not always equipped to use it confidently.

Release fatigue

New features are constantly released, but teams are unsure what to prioritise.

Underused capability

Workday provides more features than what is currently being utilised.

Section 4: Solution / Zeneesha Approach (Revised)

Headline:

Continuous improvement is driven proactively, not reactively.

Short Copy:

Zeneesha takes a proactive approach to your Workday environment — identifying risks, strengthening processes, and driving improvements before issues become recurring challenges.

Approach Points

Review

Assess your setup, workflows, reporting, integrations, and adoption.

Reveal

Find the patterns, gaps, and risks behind everyday friction.

Roadmap

Prioritise the improvements that will create the greatest business value.

Refine

Keep Workday aligned as your organisation evolves.

Section 5: Services Introduction -

Headline:

Your Trusted Partner Across the Entire Workday Lifecycle

Subheadline:

From implementation, optimisation, and automation, Zeneesha helps teams shape, support, and maximise Workday.

Service Blocks - (There are a lot of services in the PDF, do we have to mention them all or can we list a few and for the remaining we can add - click for more - pls confirm)

Start Your Workday Journey

Implementation, planning, migration, testing, go-live support, and change management.

Grow Your Workday Value

AMS, health checks, enhancements, releases, reporting, and insights.

Achieve More with Workday

Automation, adoption, analytics, integrations, extensions, and rollouts.

CTA:

Explore our services

OR

Implementation

Advisory, planning, migration, and go-live support to start Workday with confidence.

AMS & Support

Health checks, releases, reporting, and enhancements to keep Workday improving.

Maximise

Automation, analytics, integrations, and adoption to unlock more from Workday.

CTA - View More

Section 6: Testimonial

Add hers' Testimonial 2 - Georgina Tatitt

Section 7: Case Study

Headline:

From Workday backlog to faster delivery.

Or

From Workday backlog to 700% faster sprint turnaround.

Zeneesha helped AQA improve its Workday HCM support model by introducing a clearer intake and prioritisation process for recruitment, absence and change requests.

Result: Sprint capacity increased from 2 to 16 tickets per sprint, helping the team reduce backlog and respond more effectively to the business.

Here are 5 homepage FAQs written to catch user pain points without sounding too heavy or generic.

Section 8 - FAQ Section

1. How do I know if our Workday system needs a health check?

If teams are raising the same tickets, relying on manual workarounds, waiting too long for reports, or struggling with adoption, it may be time to review the setup. A Workday Health Check helps identify what is causing friction and where improvement can create the most value.

2. Can Zeneesha help if we already have Workday implemented?

Yes. Zeneesha supports organisations beyond go-live with AMS, optimisation, reporting, releases, adoption, integrations, and ongoing improvement. The goal is to keep Workday aligned as your people, processes, and priorities change.

3. We have recurring Workday issues. Will Zeneesha just fix tickets?

No. Zeneesha looks beyond the ticket to understand the root cause. We help your team compare practical options, prioritise what matters, and choose the next step that improves Workday for the long term.

4. Can Zeneesha support both HCM and Finance?

Yes. Zeneesha works across Workday HCM, Finance, Analytics, Adaptive Planning, reporting, AMS, integrations, and optimisation, helping teams connect business needs with the right Workday improvements.

5. What happens during a Workday Health Checkup?

Zeneesha reviews your Workday environment, including processes, data, reporting, integrations, adoption, and support patterns. You receive a clearer view of gaps, risks, and opportunities, along with practical recommendations for what to improve next.

Revised Homepage FAQs

1. How do I know if our Workday system needs a health check?

If you are seeing recurring issues, manual workarounds, reporting delays or low adoption, it may be time to review what is causing friction.

2. Can Zeneesha help if Workday is already implemented?

Yes. Zeneesha supports post-go-live Workday environments through AMS, optimisation, reporting, releases, integrations, automation and adoption support.

3. We already have an internal Workday team. Can you still help?

Yes. Zeneesha works alongside internal teams to add specialist expertise, extra capacity and a clearer improvement roadmap.

4. Which Workday modules does Zeneesha support?

Zeneesha supports key Workday modules including HCM, Finance, Adaptive Planning and Analytics, with expertise across reporting and integrations.

5. What happens during a Workday Health Checkup?

Zeneesha reviews your Workday setup, processes, data, reporting, integrations and adoption to identify gaps, risks and optimisation opportunities.

Section 7: Case Study - FINAL (Use the exact content from the case study)

Headline:

From recurring Workday issues to a clearer roadmap.

The Signal

The client was facing repeated support requests, reporting delays, and growing frustration across teams.

The Diagnosis

Zeneesha reviewed the Workday environment to identify where process gaps, configuration issues, and reporting limitations were creating friction.

The Decision

Rather than applying isolated fixes, Zeneesha mapped the available options and prioritised the improvements that would create the most value.

The Outcome

The client gained clearer reporting, fewer recurring issues, and a practical roadmap for ongoing Workday optimisation.

Primary CTA:

Discuss Your Workday Priorities

Secondary CTA:

Request a Workday Health Check

Supporting Trust Line:

Flexible, cost-effective Workday expertise across HCM, Finance, Planning, Reporting and Integrations.

Hero Visual / Floating Cards Copy

Tickets piling up?

Bring structure to AMS support.

Reports questioned?

Build confidence in Workday data.

Workflows ageing?

Optimise Workday around the business.

Section 2: Problem Section

Section Label:

After go-live

Headline:

Workday is live.

But is it delivering the value your business expected?

Subheadline:

For many organisations, the real challenges begin after implementation - when

users need support, workflows need refining, reports need trust, and the business starts asking for more.

Body Copy:

Workday may already be running in your organisation. But over time, the gaps begin to show.

Support tickets remain unresolved. Workflows become outdated. Reports do not give leaders the confidence they need. Users struggle with the application. HR, Finance and IT teams continue to depend on manual workarounds.

In most cases, the issue is not Workday itself.

The issue is that the system needs the right support, the right improvements and the right partner to help it evolve with the business.

That is where Zeneesha comes in.

Bullet Points:

- Support backlogs are slowing down day-to-day operations
- Workflows feel outdated, inconsistent or difficult to use
- Workday data is not fully trusted as the single source of truth
- Reporting and visibility are not strong enough for leadership decisions
- Users need better guidance, training and adoption support
- Internal teams lack the time or module expertise to handle every request
- The organisation is not yet seeing the full ROI from Workday

CTA:

Tell Us What You Need to Improve

Section 3: Outcome / Value Section

Section Label:

What Zeneesha helps you achieve

Headline:

A smoother Workday environment.

Faster support.

Cleaner data.

More confidence.

Sub-headline:

Zeneesha is not here to simply close tickets. We help clients improve the way Workday supports their people, processes and decisions.

Outcome Block 1

Headline:

Faster, more reliable AMS support

Body Copy:

Bring structure to support with clearer ticket prioritisation, stronger turnaround, SLA-led responses and better handling of production issues.

Outcome Block 2

Headline:

Workday aligned to your business

Body Copy:

Optimise workflows, configurations and enhancements so Workday reflects how your HR, Finance and operations teams actually work.

Outcome Block 3

Headline:

Data and reporting people can trust

Body Copy:

Improve reporting, visibility and data quality so Workday becomes a stronger source of truth for leadership and business teams.

Outcome Block 4

Headline:

Flexible expertise without the heavy model

Body Copy:

Access experienced Workday consultants and advisory support without being locked into a large, rigid AMS structure.

Section Closing Copy:

Whether you need ongoing AMS, a tenant health check, optimisation support, integrations, reporting improvements or specialist consultants, Zeneesha helps you start with the area that matters most - and expand when the value is clear.

Video Sales Letter - VSL - Lead Magnet

Video / Lead Magnet Section -

Section Label:

WORKDAY VALUE BRIEFING

Headline:

Is Workday delivering the value your business expected?

Subheadline:

Watch Zeneesha's short advisory briefing on how hidden gaps, recurring issues and underused capabilities can become clearer next steps.

Video Title:

The 2-Minute Workday Value Briefing

Primary CTA:

Watch the Briefing

Secondary CTA:

Request a Workday Health Checkup

Microcopy:

For teams reviewing Workday performance, adoption, reporting, support or optimisation opportunities.

I would place the video directly under the headline and subheadline, then place the CTA below the video. That way, the user first recognises the problem, watches the perspective, and then has a clear next action.

The flow should be:

Headline → short subheadline → video → CTA → microcopy

The 2-Minute Workday Value Briefing - VSL Script

Workday is a major investment.

But the real value does not end at go-live.

As your business grows, Workday needs to grow with it. Processes change. Teams expand. Reporting needs become sharper. New regions, modules and priorities appear.

And over time, small signs of friction can start to surface.

Recurring tickets.

Manual workarounds.

Reports that take too long to trust.

Processes that no longer reflect how the business actually works.

On the surface, these may look like isolated issues.

But often, they are signals.

Signals that Workday needs a closer look, a clearer roadmap or a more proactive partner.

At Zeneesha, we help organisations make Workday mean more to the business.

That means looking beyond the ticket. Understanding what is causing friction. Showing the possible paths forward. And helping you choose the option that creates the most value next.

Sometimes that means improving a workflow.

Sometimes it means strengthening adoption.

Sometimes it means better reporting, cleaner integrations, smarter automation or a full system health check.

Zeneesha supports organisations across the full Workday journey — from implementation and go-live support to AMS, optimisation, analytics and continuous improvement.

So whether you are starting your Workday journey, stabilising your current environment or ready to maximise what Workday can deliver, we help you move forward with clarity.

If you are ready to see where Workday could deliver more, request a Workday Health Checkup.

Zeneesha will help you identify the gaps, understand your options and take the right next step.
