

Workday Inefficiency Calculator

What Is Workday Inefficiency Costing Your Business? |

Most organisations can tell you exactly what |
Workday costs. Far fewer can tell you what |
inefficient Workday usage costs. |

Number of Employees: 3,000 |

500 -----●----- 10,000 |

Estimated Annual Cost Of Inefficiency |

£1,174,000 |

Math logic:

employees = slider value

managers = employees * 0.167

hr_staff = employees * 0.0167

hris_staff = employees * 0.00167

low_adoption =

employees * 5 * 52 / 60 * 30

hr_inefficiency =

hr_staff * 60000 * 0.10

reporting_delay =

hris_staff * 10 * 52 * 40

governance_failure =

$200000 * (\text{employees} / 3000)^{0.85}$

ticket_backlog =
hris_staff * 70000 * 0.30

manager_self_service =
managers * 15 * 12 / 60 * 50

total_annual_cost =
low_adoption + hr_inefficiency + reporting_delay + governance_failure + ticket_backlog +
manager_self_service

Javascript Array:

```
const employeeValues = [  
  500, 600, 700, 800, 900, 1000, 1250, 1500, 1750, 2000, 2250, 2500, 2750, 3000,  
  3500, 4000, 4500, 5000, 5500, 6000, 6500, 7000, 7500, 8000, 8500,  
  9000, 9500, 10000  
];
```

Core HTML:

```
<div class="workday-calculator">
